

ABOUT US

Piramal Group is a global business conglomerate with diverse interests in Pharma, Financial Services and Real Estate. The Group has offices in over 30 countries and a global brand presence in more than 100 markets.

Led by Mr. Ajay Piramal, the Chairman, Piramal Group is a torchbearer of trusteeship and responsible business ethos. Based on the philosophy of 'Doing Well and Doing Good', the Group continues to create long term value for its stakeholders and the community at large.

Piramal Retail Finance, the consumer lending platform of Piramal Enterprises Limited, engages in various financial services businesses. It is focused on serving all lending needs of consumers and small businesses across Bharat, differentiating through product personalization, superior customer experience. Currently, it offers multiple products in its target markets, including Affordable Housing loans, Mass Affluent Housing loans, Loans Against Property, Secured Small Business Lending, Digital Purchase Finance, Digital Personal Loans, and Used Car loans across Tier I, II and III cities.

Focused on building strong partnerships, the Company offers an Artificial Intelligence enabled multi-product retail lending platform by augmenting a 'Digital at its Core' strategy via physical customer connect points for budget customers of Bharat. Its vision is to reach to customer segments, especially those that do not have easy access to the Indian financial systems, across geographies.

Data Scientist – MT/ GET/ Intern

Business Unit :	Retail Finance Group		
Location :	Mumbai/ Bangalore	Band	
Department :	BIU	Degree of travel required	As required
Purpose of Job:	We are building a high-caliber analytics and AI team to solve impactful, real-world problems using data, models, experimentation, and structured thinking . As a Management Trainee, you will work across analytical, modeling, automation, and insight-generation initiatives while collaborating closely with Data Science/Engineering/Analytics and AI Labs to deploy scalable solutions.		
Key Stakeholders:	External	Internal	
	- Agencies - External Vendors	- BIU internal Team - Business Functions - Technology team	
Reporting Structure:	Role directly reports to	Positions that reports into this role	
	Hiring Lead	NA	
Essential Qualifications:	Btech/ Mtech		

Required Skills:

- Strong analytical reasoning and first-principles problem solving, with the ability to learn new modeling techniques and system behaviors quickly.
- Python (pandas, numpy, scikit-learn)
- SQL (must-have), Excel / Power BI (good to have)
- Exposure to PyTorch / TensorFlow and model evaluation methods (Evals)
- Familiarity with HuggingFace, LangChain/ LlamaIndex, RAG systems, vector stores, knowledge graphs

Key Responsibilities:

- Break down **ambiguous problems** into structured analytical approaches.
- Perform **exploratory data analysis** to discover patterns and derive actionable insights.
- Build and evaluate **predictive ML models**(e.g., classification, regression, anomaly detection, embeddings).
- Contribute to the development of **GenAI workflows and Agentic AI Manufacturing** to enhance analyst and operational productivity.
- Design and maintain **dashboards and monitoring frameworks** for leadership decision-making.
- Collaborate with Data Engineering to **deploy and operationalize models** and data workflows.
- Stay updated on emerging techniques, benchmark performance, and share research findings internally.

Who will thrive here?

- You enjoy **figuring things out from first principles**.
- You move fast, experiment, iterate, and communicate clearly.
- You value working with **smart, driven people who take ownership**.
- You prefer **impact and learning** over hierarchy and rigid processes
